

LONE STAR STONE

the natural choice.

Add warmth and beauty to your next project, easily and economically.

Lone Star Stone is more than the nation's premier supplier of manufactured stone veneers. We're the answer to your architectural and engineering challenges, and the supplier that can make your next project – commercial or residential – simply spectacular. Our products, which come in a large variety of styles and colors available anywhere, are lightweight, affordable, easy to install and maintenance free. That's why architects, developers and designers across the country demand Lone Star Stone for their projects ... and you should too. The beauty and durability of Lone Star Stone accentuates any project, large or small, in any environment, inside or out. When it comes to construction, Lone Star Stone is ... the natural choice. With Lone Star Stone your project is limited only by your imagination. Rustic. Modern. European. Formal. Relaxed. From Austin Chalk to Pocono Chisel, we have a stone that fits your environment and your budget.

Why Lone Star Stone is right for your project.

Beautiful, economical, adaptable, durable, lightweight and easy to install - these are just a few of the qualities you'll love about Lone Star Stone. Lone Star Stone looks and acts natural because it is natural. Our stone is made of Portland cement, mineral oxide colors and lightweight aggregates – all basic components of natural stone, so in essence Lone Star Stone is natural stone - redefined. Our unique molding method replicates the actual shape and texture of any natural stone. As a result there are only two real differences between our products and those created by nature: Lone Star Stone is a fraction of the weight and cost.

At Lone Star Stone we know delivering a great-looking product is just the beginning. That's why we back our products with:

- * **EXTENSIVE SUPPORT.** From easy to follow installation instructions to detailed architectural information and on-site visits, we're there for you.
- * **COMPETITIVE PRICING.** We challenge you to find a competitor who offers a quality stone at a better price.
- * **UNSURPASSED QUALITY.** Code enforcement officials love seeing Lone Star products on a building. Buyers love seeing it too, because of the 30-year warranty.
- * **EFFICIENT DELIVERY.** We offer one of the shortest delivery time in the business.
- * **REVOLUTIONARY TECHNOLOGY AND MOLDS.** We've been refining manufacturing since we started making stone in 1986. That's why our products are of uniform quality, fit and finish.
