

MEASURING YOUR SPACE

3220 Old Pickett Road
Fairfax, VA 22031

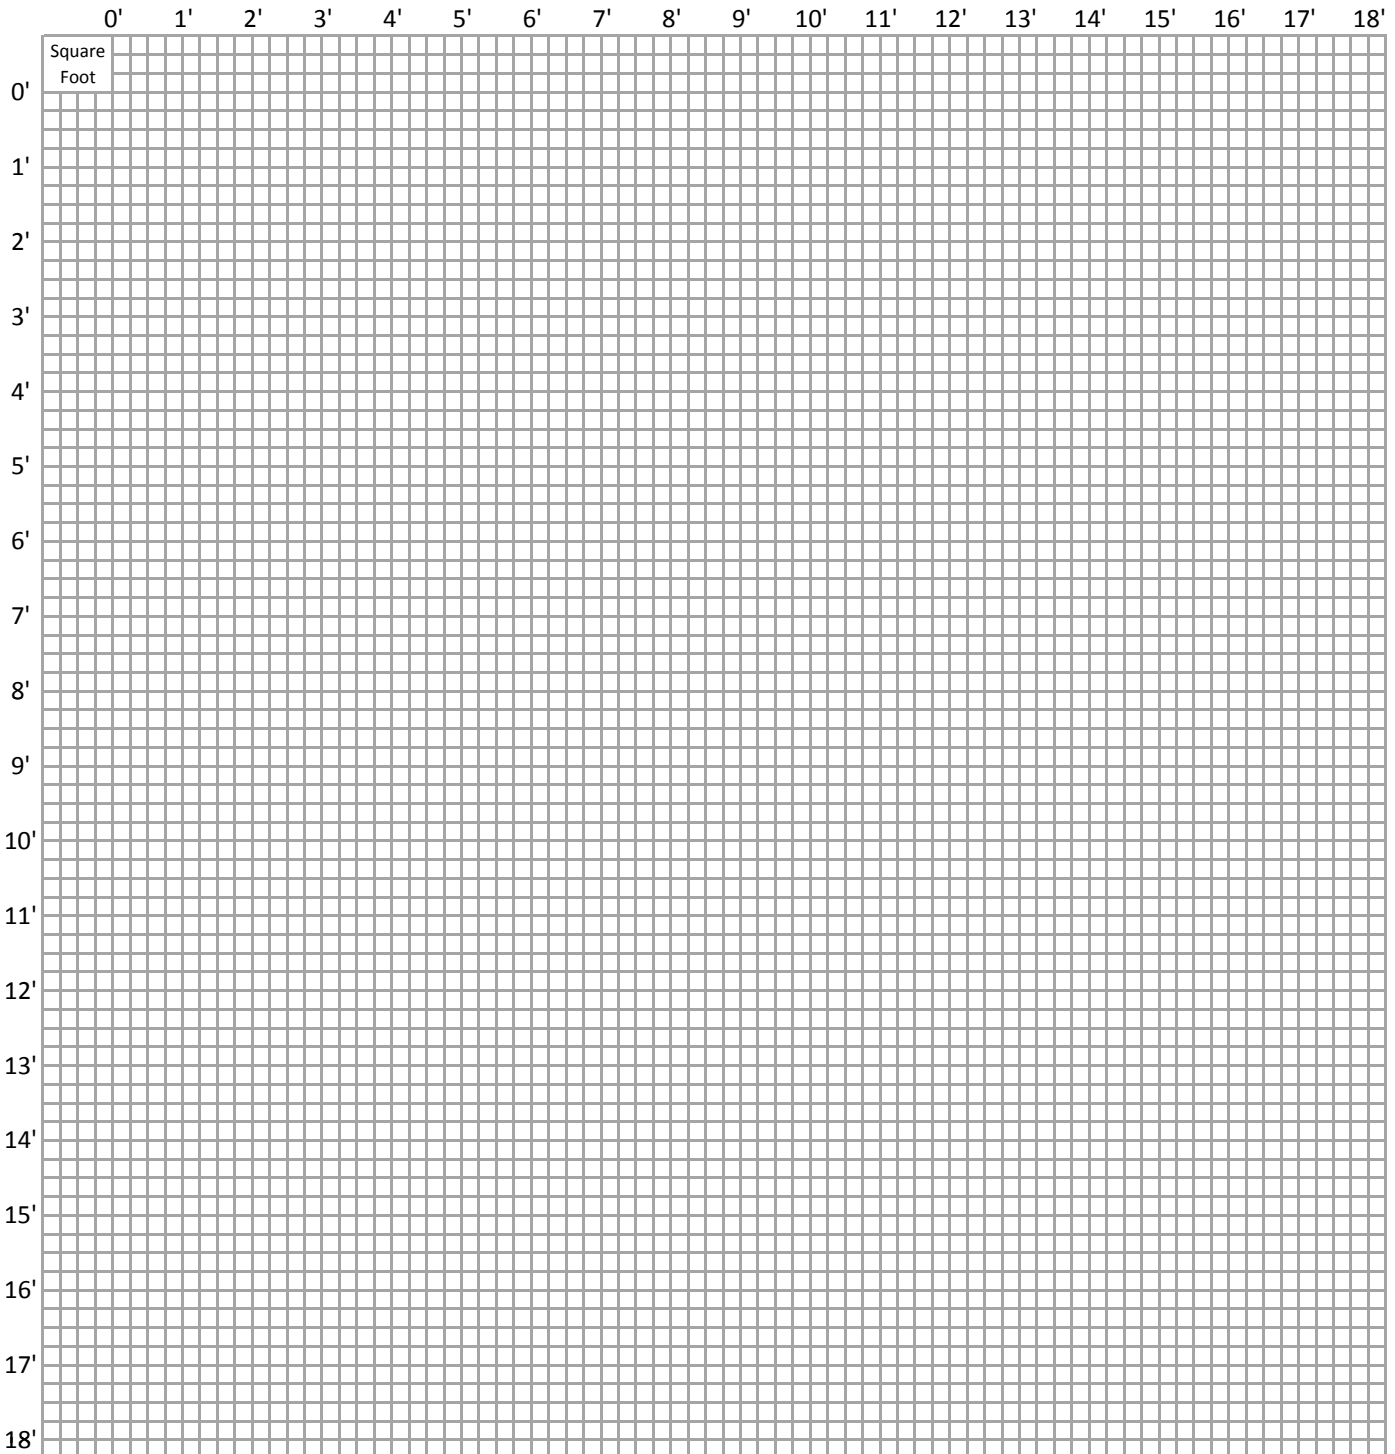

1. Start by measuring each wall of the room and recording the inside dimensions. Measure at the floor then again in the center of the wall and the ceiling, this will be for accuracy and to evaluate the squareness of the room.
- 2.) Locate the centerline of the sink and record that onto your drawing, indicate water supply, natural gas supply or 220-volt electric service (stove).
3. Next measure each wall individually recording all critical measurements to include any obstacles and their location (i.e. outlets, switches, lights, cables, heat registers, phone jacks, doors, windows, etc.).
4. Measure the height of the window sill, height and width of the window and doors and heights of ceilings and soffits. Record this information on the Door, Window and Soffit charts.
